Education

Emory University — May 2026
MSPH in Epidemiology | Data Science Certificate — Atlanta, GA
GPA: 3.96/4.00

Franklin & Marshall College — May 2024
Bachelor of Arts in Public Health (Biology) — Lancaster, PA
GPA: 3.73/4.00

Experience

Data Reporting and Analytics Consultant II — Oct 2026 to Present
Full Time, Kaiser Permanente Division of Research — Fremont, CA

- Extract and integrate clinical and internal healthcare data using SQL and R, independently build analysis-ready datasets, and conduct statistical analyses for clinical and epidemiologic research.
- Participate in a clinical trial practice group, analyzing trial datasets and discussing statistical methods and interpretation.

Student Intern — August 2025 to March 2026
Database Management, Emory University Rollins School of Public Health — Atlanta, GA

- Curated clinical data for 73,000+ Kaiser Permanente patients by systematically reviewing and categorizing Electronic Medical Records (EMRs) in Excel to ensure high data fidelity for epidemiologic research

Graduate Research Assistant — March 2025 to May 2026
Master's Thesis, Emory University Rollins School of Public Health — Atlanta, GA

- Conduct longitudinal analysis for master's thesis on a Congenital Adrenal Hyperplasia cohort of 2,415 subjects (115 CAH cases, 2,300 referents) to evaluate cardiovascular indicators using regression and mixed-effects models in SAS/R
- Led data management efforts to construct 30+ analytic variables and authored the thesis manuscript for submission

Graduate Research Assistant — January 2025 to May 2026
HIV Behavior, Emory University Rollins School of Public Health — Atlanta, GA

- Analyzed associations between PrEP adherence and sexual behaviors using Fisher's exact tests in R, developed 20+ analytic variables, and led manuscript preparation, resulting in a first-author publication in AIDS and Behavior.
- Conduct longitudinal analyses for the HealthMindr Project in SAS

Graduate Research Assistant — September 2024 to May 2026
SHARE/SING Study, Emory University School of Medicine — Atlanta, GA

- Collaborate with clinical and laboratory teams to coordinate specimen collection, processing timelines, and data integration for translational HIV prevention studies
- Perform p24 ELISA assays and multiplex cytokine panels to evaluate inflammatory responses.
- Conducted qRT-PCR to measure HIV replication in ex vivo human colon biopsies treated with different HIV strains
- Process human primary cells and tissues to support longitudinal ex vivo HIV-1 challenge experiments

Student Internship — June 2023 to May 2024
HIV study, Temple University — Philadelphia, PA

- Performed 1,000+ RNA extractions and 100+ RT/qPCR assays to generate reliable data for ongoing research
- Conducted HIV latency reactivation experiments across multiple cell models to investigate therapeutic strategies
- Contributed experimental data that supported successful conference abstract submission

Skills, Certifications & Languages

Technical Skills: R, SAS, Python, SQL, SPSS, Excel, GitHub, Shiny, Tableau
Research & Analytical Skills: Clinical and translational research, epidemiologic analysis, data management, statistical programming, longitudinal data analysis, laboratory assays, scientific writing, literature review, interdisciplinary collaboration
Certifications: CITI GCP, CITI Human Subjects Research, CITI Health Privacy
Languages: English (Full Professional), Chinese (Native), Japanese (Elementary)
